### Need a Break?

Whether you're going on sloped terrain or hauling heavy loads, you know you're in good hands riding a Can-Am Defender XT. This workhorse comes equipped with a brake holding mechanism; this feature maintains constant pressure on the brake pedal when needed to keep the vehicle from moving and give you peace of mind.

### VERSA is for Versatile

Work hard, rest harder. The Can-Am Defender XT takes that motto to heart with the ultra-comfortable VERSA-PRO bench seat. Get in and out of your workhorse in no time to focus on the task at hand. That's the best way to make the long days of hard work flash by!

### Power Out of a Jam

The 4,500-lb (2,041 kg) integrated winch with roller fairlead engages with the flick of a switch to dominate the most difficult tasks. Effective for vehicle recovery, hunting trips, clearing brush, and at the job site. It's one of the most powerful tools built into the Defender XT.

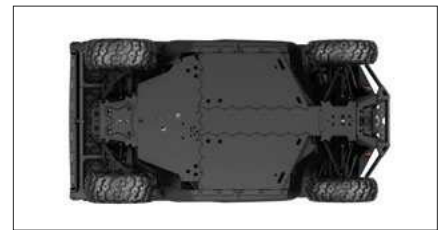

### More Bumps? No Problem!

At the front of this side-by-side sits a dependable and sturdy XT front bumper. Protecting the front of your vehicle, this bumper clears the way with enhanced protection from the obstacles you drive across.

### Not Just a Roof!

Over your head in the Can-Am Defender XT is a full hard roof that gives you better protection from the elements. Keep sunlight, rain or snow away when getting tasks done.

### Protection Wherever You Go

This model sports a High Molecular Weight Polyethylene (HMWPE) full skid plate for full protection under the unit. No matter the terrain or weather, you can keep riding and working with confidence knowing that the Can-Am Defender XT will glide smoothly over obstacles of all sizes.

## Feature highlights

### Locking into Action for a Difference

The Visco-Lok® QE Quick Engagement front differential on the Can-Am Commander MAX DPS 700 comes with more grip than you could hope for. This feature turns the front differential on your vehicle into a sort of pump: the front wheels' spinning locks the feature in place quickly. Plus, with no rev or speed limiter, it delivers optimal wheel traction on every adventure.

### Get on My Lawn!

The Can-Am Commander MAX DPS 700 is the do-it-all vehicle that goes anywhere... including safely on your lawn! No need for detours with the rear differential with Turf mode on this side-by-side: as you haul food or anything you want back home, select the Turf mode to ride across your grass with little to no damage.

### Steering Clear of Issues

The Can-Am Commander MAX DPS 700 comes with Dynamic Power Steering (DPS). This high-torque technology is the stabilizing force you need to own every challenge: it's useful against external forces like strong crosswinds or uneven roads. With DPS, you ride confidently knowing you'll never veer off path.

### Two Modes, Many Riders

Do you prefer going full throttle or a more laid-back experience? With the Can-Am Commander MAX DPS 700, you don't have to choose. With SPORT and ECO™ driving modes, every rider can pick between performance and the most engaging throttle response on one side, and fuel economy and the smoothest throttle response on the other side.

### Anti-Theft Protection

A ride this special deserves heightened security. Encrypted chip technology - one vehicle, one key, one code - restricts access to only the owner. The electronic ignition system and ball-and-socket key design team up for a reliable wireless connection. Additional keys, programmed for other riders, can be added at any time.

### Trip Info at Your Fingertips

The 4.5 inch digital display keeps the Can-Am Commander DPS 700's crucial information at hand. Features include speedometer, gear position, temperature, engine lights control, electronic fuel gauge, clock and more.

### Open the Door to New Rides

Push further in a Can-Am Commander MAX DPS 700 equipped with premium half doors. At every turn, these high-quality half doors deliver better protection to keep everyone safe and sound inside the vehicle's cockpit.

### Can Things Get Too Muddy?

This do-it-all side-by-side comes equipped with mudguards to help riders dive into the gnarliest holes they come across. The curved strip or cover over the wheel of the unit is designed to protect both rider and vehicle from water and dirt that jumps in the air as you enjoy epic mud adventures.

## Feature highlights

### Powerful Rotax Engine

Rotax® ACE 650-cc single cylinder engine is built to exceed expectations. With 52 horsepower and 41 lb-ft behind it, this engine delivers responsive power and torque from the moment riders put their hands on the wheel.

### CVT Delivers in the Clutch!

The primary CVT is the primary reason why a Maverick Trail 700 is so much fun! This feature comes with engine braking and protects the electronic drive belt of your high-performing sidekick. Take it all in and it delivers instant performance, more traction and more reliability – but that's not all! The primary CVT is less noisy, less harsh and requires less maintenance.

### Differential That Makes a Difference

The Can-Am Maverick Trail 700 has a Visco-Lok® auto-locking front differential that delivers grip and traction for days wherever you're riding. This feature turns the front differential on your vehicle into a sort of pump: the front wheels' spinning locks the feature in place. Engage wheel drive lock mode for better traction and keep rolling on for epic adventures.
